I. Overview

On January 9-11, 2024, the Correctional Medical Authority (CMA) conducted an offsite physical and mental health survey of Everglades Re-Entry (EVERE). The survey report was distributed on February 14, 2024. In March 2024, EVERE submitted, and the CMA approved, the institutional corrective action plan (CAP) which outlined the efforts to be undertaken to address the findings of the EVERE survey. These efforts included in-service training, physical plant improvements, and the monitoring of applicable medical records for a period of no less than ninety days. Items II and III below describe the outcome of the CMA's evaluation of the institution's efforts to address the survey findings.

Summary of CAP Assessments for Everglades Re-Entry

Screen 3: All diagnostic tests are completed prior to the periodic screening encounter	X				
Screen 4: Referral to a clinician occurs if indicated	X				

III. Mental Health Assessment Summary

There were no mental health findings as a result of the January 2024 survey.

IV. Conclusion

All findings as a result of the January 2024 survey are closed and no further action is required on this CAP. The CMA appreciates the efforts to improve services and documentation at this institution and continues to encourage ongoing quality improvement activities to ensure that the proper provision of health care services is maintained.
