CAP Assessment Distributed on July 7, 2016

CAP Assessment of Lake Correctional Institution

I. Overview

On August 13 - 14, 2014, the Correctional Medical Authority (CMA) conducted an on-site physical and mental health survey of Lake Correctional Institution (LAKCI). The survey report was distributed on September 8, 2014. In October 2014, LAKCI submitted and the CMA approved, the institutional corrective action plan (CAP) which outlined the efforts to be undertaken to address the findings of the August 2014 survey. These efforts included in-service training, physical plant improvements, and the monitoring of applicable medical records for a period of no less than ninety days.

On March 3, 2015, CMA staff requested access to monitoring documents to assist in determining if an on-site or off-site assessment should be conducted. Based on the documents provided, CMA staff conducted an on-site CAP assessment on March 17, 2015 to evaluate the effectiveness of corrective actions taken by institutional staff. The CAP closure files revealed sufficient evidence to determine that 12 of 24 physical health findings and 28 of 48 mental health findings were corrected.

On May 27, 2015, CMA staff requested access to monitoring documents to assist in determining if an on-site or off-site assessment should be conducted. Based on the documents provided, CMA staff conducted an on-site assessment on June 30, 2015 to evaluate the effectiveness of corrective actions taken by institutional staff. The CAP closure files revealed sufficient evidence to determine that 6 of 12 physical health findings and 4 of 20 mental health findings were corrected. Additionally, one physical health finding was added for in-service training, monitoring, and corrective action.

On September 3, 2015, CMA staff requested access to monitoring documents to assist in determining if an on-site or off-site assessment should be conducted. Based on the documents provided, CMA staff conducted an on-site assessment on September 29, 2015 to evaluate the effectiveness of corrective actions taken by institutional staff. The CAP closure files revealed sufficient evidence to determine that 0 of 6 physical health findings and 3 of 16 mental health findings were closed. Additionally, one mental health finding was added for in-service training, monitoring, and corrective action.

On February 9, 2016, CMA staff requested access to monitoring documents to assist in determining if an on-site or off-site assessment should be conducted. Based on the documents provided, CMA staff conducted an on-site assessment on March 3, 2016 to evaluate the effectiveness of corrective actions taken by institutional staff. The CAP closure files revealed sufficient evidence to determine that 5 of 7 physical health findings and 5 of 14 mental health findings were corrected.

On May 12, 2016, CMA staff requested access to monitoring documents to assist in determining if an on-site or off-site assessment should be conducted. Based on the documents provided, CMA staff conducted an on-site assessment on June 27, 2016 to evaluate the effectiveness of corrective actions taken by institutional staff. Items II and III below describe the outcome of the CMA's evaluation of the institution's efforts to address the survey findings.

II. Physical Health Assessment Summary

The CAP closure files revealed sufficient evidence to determine that 0 of the 2 physical health findings were corrected. Two physical health findings will remain open.

Finding	CAP Evaluation Outcome
TUBERCULOSIS CLINIC	PH-11 OPEN
A comprehensive review of 6 inmate records revealed the following deficiencies: PH-11: In 2 of 2 applicable records, there was no evidence that the correct number of doses of Isoniazid (INH) medication was given.	Adequate evidence of in-service training was provided, however a review of randomly selected records indicated an acceptable level of compliance had not been met. PH-11 will remain open. PH-12 OPEN
PH-12: In 1 of 1 applicable record, there was no evidence that the inmate was seen by the clinician at the completion of therapy.	Adequate evidence of in-service training was provided, however there were no applicable episodes available for review. PH-12 will remain open.

II. Mental Health Assessment Summary

The CAP closure files revealed evidence to determine that 1 of 9 mental health findings were corrected. Eight mental health findings will remain open.

Finding	CAP Evaluation Outcome
SELF-HARM OBSERVATION STATUS (SHOS) A comprehensive review of 4 Self-harm Observation Status (SHOS) admissions revealed the following deficiencies: MH-7: In 1 record, the documentation did not indicate the inmate was observed at the frequency ordered by the clinician.	MH-7 & MH-8 OPEN Adequate evidence of in-service training was provided, however a review of randomly selected records indicated an acceptable level of compliance had not been reached. MH-7 & MH-8 will remain open.

Finding	CAP Evaluation Outcome
MH-8: In 2 records, the "Inpatient Mental Health Daily Nursing Evaluation" was not completed once per shift.	

Finding	CAP Evaluation Outcome
INPATIENT PSYCHOTROPIC MEDICATION PRACTICES MH-15: In 8 of 17 records reviewed, physician's orders were not dated, timed, and/or stamped.	MH-15 CLOSED Adequate evidence of in-service training and documentation of correction were provided to close MH-15.

Finding	CAP Evaluation Outcome
INPATIENT MENTAL HEALTH SERVICES A comprehensive review of 18 inpatient records revealed the following deficiencies: MH-28: In 15 of 16 applicable records, vital signs were not taken daily for 5 days for new admissions. MH-31: In 10 records, the required hours of planned structured therapeutic services were not provided. MH-33: In 10 records, the "Inpatient Daily"	MH-28, MH-31, MH-33, MH-34, & MH-35 OPEN Adequate evidence of in-service training was provided, however a review of randomly selected records indicated an acceptable level of compliance had not been reached. MH-28, MH-31, MH-33, MH-34, & MH-35 will remain open.
Nursing Evaluation" was not completed as required.	
MH-34: In 16 records, vital signs were not recorded as required.	
MH-35: In 17 records, weight was not recorded weekly as required.	

CAP Evaluation Outcome
MH-38 OPEN Adequate evidence of in-service raining was provided, however a eview of randomly selected records an acceptable level of ompliance had not been reached. MH-38 will remain open.
nd ev nd

III. Conclusion

All physical health portions will remain open. MH-15 will close and all other mental health findings will remain open.

Until such time as appropriate corrective actions are undertaken by LAKCI staff and the results of those corrections reviewed by the CMA, this CAP will remain open. As some of the necessary steps to correct findings require further institutional monitoring, closure may take as long as three months. Follow-up assessment by the CMA will most likely take place through an on-site visit.
