

**SECOND ON-SITE CORRECTIVE ACTION PLAN
ASSESSMENT**

of

LOWELL CORRECTIONAL INSTITUTION

for the

Physical and Mental Health Survey
Conducted February 18 -19, 2015

CMA STAFF

Jane Holmes-Cain, LCSW
Lynne Babchuck, LCSW

CAP Assessment Distributed on December 28, 2015

CAP Assessment of Lowell Correctional Institution

I. Overview

On February 18-19, 2015, the Correctional Medical Authority (CMA) conducted an on-site physical and mental health survey of Lowell Correctional Institution (LOWCI). The survey report was distributed on March 26, 2015. In April of 2015, LOWCI submitted and the CMA approved, the institutional corrective action plan (CAP) which outlined the efforts to be undertaken to address the findings of the February 2015 survey. These efforts included in-service training, physical plant improvements, and the monitoring of applicable medical records for a period of no less than ninety days.

On July 27, 2015, CMA staff requested access to monitoring documents to assist in determining if an on-site or off-site assessment should be conducted. Based on the documents provided, CMA staff conducted an on-site CAP assessment on August 26 & 27, 2015 to evaluate the effectiveness of corrective actions taken by institutional staff. The CAP closure files revealed sufficient evidence to determine that on the Main Unit, 22 of 46 physical health findings and 21 of 28 mental health findings were corrected. On the Annex, 24 of 55 physical health findings and 20 of 32 mental health findings were corrected. Additional physical health findings, 3 on the Main Unit and 1 on the Annex, were added for in-service training, monitoring, and corrective action.

On November 2, 2015 CMA staff requested access to monitoring documents to assist in determining if an on-site or off-site assessment should be conducted. Based on the documents provided, CMA staff conducted an on-site CAP assessment on December 15 & 16, 2015 to evaluate the effectiveness of corrective actions taken by institutional staff. Items II and III below describe the outcome of the CMA's evaluation of the institution's efforts to address the survey findings.

II. Physical Health Assessment Summary

A. Main Unit

The CAP closure files revealed sufficient evidence to determine that 6 of 27 physical health findings were corrected. Twenty-one physical health findings will remain open and one finding will be added for in-service training, monitoring, and corrective action.

Finding	CAP Evaluation Outcome
<u>CARDIOVASCULAR CLINIC</u> PH-2: In 4 of 13 applicable records (18 reviewed), there was no evidence that abnormal laboratory results were addressed.	PH-2 OPEN Adequate evidence of in-service training was provided, however institutional monitoring indicated an acceptable level of compliance had not been met. PH-2 will remain open.

Finding	CAP Evaluation Outcome
<p><u>ENDOCRINE CLINIC</u></p> <p>A comprehensive review of 16 records revealed the following deficiencies:</p> <p>PH-4: In 4 records, the physical examination was incomplete or missing.</p> <p>PH-5: In 6 of 10 applicable records, there was no evidence of the annual fundoscopic examination.</p> <p>PH-6: In 2 of 7 applicable records, aspirin therapy was not initiated for inmates with vascular disease or other risk factors.</p> <p>PH-7: In 2 of 9 applicable records, ACE/ARB therapy was not initiated for diabetic inmates experiencing hypertension.</p>	<p>PH-4 OPEN</p> <p>Adequate evidence of in-service training was provided, however a review of randomly selected records indicated an acceptable level of compliance had not been met. PH-4 will remain open.</p> <p>PH-5, PH-6 & PH-7 OPEN</p> <p>Adequate evidence of in-service training was provided, however institutional monitoring indicated an acceptable level of compliance had not been met. PH-5, PH-6 & PH-7 will remain open.</p>

Finding	CAP Evaluation Outcome
<p><u>GASTROINTESTINAL CLINIC</u></p> <p>A comprehensive review of 17 records revealed the following deficiencies:</p> <p>PH-10: In 4 of 16 applicable records, there was no evidence that hepatitis A & B vaccines were given to inmates with hepatitis C infection and no prior history of A & B infection.</p> <p>PH-11: In 1 of 3 applicable records, there was no referral to a specialist although indicated.</p>	<p>PH-10 OPEN</p> <p>Adequate evidence of in-service training was provided, however institutional monitoring indicated an acceptable level of compliance had not been met. PH-10 will remain open.</p> <p>PH-11 OPEN</p> <p>Adequate evidence of in-service training was provided, however there were no applicable episodes available for review. PH-11 will remain open.</p>

Finding	CAP Evaluation Outcome
<p><u>NEUROLOGY CLINIC</u></p> <p>PH-15: In 13 of 13 applicable records (14 reviewed), seizures were not classified.</p>	<p>PH-15 OPEN</p> <p>Adequate evidence of in-service training was provided, however a review of randomly selected records indicated an acceptable level of compliance had not been met. PH-15 will remain open.</p>

Finding	CAP Evaluation Outcome
<p><u>ONCOLOGY CLINIC</u></p> <p>A comprehensive review of 4 records revealed the following deficiencies:</p> <p>PH-16: In 1 record, there was no evidence of an appropriate physical examination.</p> <p>PH-17: In 2 records, the evaluation of the control of the disease and patient status was not documented.</p> <p>PH-20: In 1 record, there was no referral to a specialist although indicated.</p>	<p>PH-16 CLOSED</p> <p>Adequate evidence of in-service training and documentation of correction were provided to close PH-16.</p> <p>PH-17 & PH-20 OPEN</p> <p>Adequate evidence of in-service training was provided, however a review of randomly selected records indicated an acceptable level of compliance had not been met. PH-17 & PH-20 will remain open.</p>

Finding	CAP Evaluation Outcome
<p><u>TUBERCULOSIS CLINIC</u></p> <p>A comprehensive review of 17 records revealed the following deficiencies:</p> <p>PH-22: In 6 records, the diagnosis was not recorded on the problem list.</p> <p>PH-23: In 1 of 5 applicable records, there was no evidence of pneumococcal vaccine or refusal.</p>	<p>PH-22, PH-23, & PH-24 CLOSED</p> <p>Adequate evidence of in-service training and documentation of correction were provided to close PH-22, PH-23, & PH-24.</p>

Finding	CAP Evaluation Outcome
<p>PH-24: In 1 of 4 applicable records, there was no evidence of influenza vaccine or refusal.</p>	

Finding	CAP Evaluation Outcome
<p><u>INFIRMARY</u></p> <p>A comprehensive review of 12 records revealed the following deficiencies:</p> <p>PH-26: In 3 records, there was no evidence that all orders were implemented.</p> <p>PH-27: In 5 of 10 applicable records, there was no evidence of a discharge note.</p> <p>PH-28: In 4 of 6 applicable records, there was no evidence that inmates on 23-hour observation status were evaluated within 30 minutes of admission.</p> <p>PH-29: In 5 of 6 applicable records, nursing evaluations were not documented at least every eight hours for inmates on 23-hour observation status.</p>	<p>PH-26, PH-27, & PH-28 OPEN</p> <p>Adequate evidence of in-service training was provided, however a review of randomly selected records indicated an acceptable level of compliance had not been met. PH-26, PH-27, & PH-28 will remain open.</p> <p>PH-29 CLOSED</p> <p>Adequate evidence of in-service training and documentation of correction were provided to close PH-29.</p>

Finding	CAP Evaluation Outcome
<p><u>INTRA-SYSTEM TRANSFERS</u></p> <p>A comprehensive review of 18 records revealed the following deficiencies:</p> <p>PH-33: In 1 of 5 applicable records, the CIC visit did not take place as indicated.</p>	<p>PH-33 OPEN</p> <p>Adequate evidence of in-service training was provided, however a review of randomly selected records indicated an acceptable level of compliance had not been met. PH-33 will remain open.</p>

Finding	CAP Evaluation Outcome
<p>PH-34: In 5 records, there was no evidence that the clinician reviewed the health record and the DC4-760A “Health Information Transfer/Arrival Summary” within 7 days of arrival.</p>	<p>PH-34 OPEN</p> <p>Adequate evidence of in-service training was provided, however institutional monitoring indicated an acceptable level of compliance had not been met. PH-34 will remain open.</p>

Finding	CAP Evaluation Outcome
<p><u>MEDICAL INMATE REQUESTS</u></p> <p>A comprehensive review of 18 records revealed the following deficiencies:</p> <p>PH-35: In 4 of 15 applicable records, there was no incidental note contained in the medical record that the request was received.</p> <p>PH-36: In 5 of 14 applicable records, there was no documentation that the interview, appointment, and/or test occurred as intended.</p>	<p>PH-35 CLOSED</p> <p>Adequate evidence of in-service training and documentation of correction were provided to close PH-35.</p> <p>PH-36 OPEN</p> <p>Adequate evidence of in-service training was provided, however a review of randomly selected records indicated an acceptable level of compliance had not been met. PH-36 will remain open.</p>

Finding	CAP Evaluation Outcome
<p><u>PERIODIC SCREENINGS</u></p> <p>PH-38: In 1 of 4 applicable records (13 reviewed), there was no referral to a clinician although indicated.</p>	<p>PH-38 OPEN</p> <p>Adequate evidence of in-service training was provided, however a review of randomly selected records indicated an acceptable level of compliance had not been met. PH-38 will remain open.</p>

Finding	CAP Evaluation Outcome
<p><u>ADDITIONAL ADMINISTRATIVE ISSUES</u></p> <p>PH-44: Inmates with a history of malignancy were not followed in the oncology clinic.</p>	<p>PH-44 OPEN</p> <p>Adequate evidence of in-service training was provided, however a review of randomly selected records indicated an acceptable level of compliance had not been met. PH-44 will remain open.</p>

Finding	CAP Evaluation Outcome
<p><u>CHRONIC ILLNESS CLINICS (CIC)</u></p> <p>CF-1: In 10 of 10 records reviewed, CIC documentation was incomplete.</p>	<p>CF-1 OPEN</p> <p>Adequate evidence of in-service training was provided, however institutional monitoring was insufficient. CF-1 will remain open.</p>

Finding	CAP Evaluation Outcome
<p><u>CONSULTATIONS</u></p> <p>CF-2: In 4 of 8 records reviewed, consultations and/or specialty services follow-up was not completed timely.</p>	<p>CF-2 OPEN</p> <p>Insufficient evidence of in-service training and monitoring were provided. CF-2 will remain open.</p>

Finding	CAP Evaluation Outcome
<p><u>PERIODIC SCREENINGS</u></p> <p>CF-3: In 6 of 6 records reviewed, the periodic screening did not contain all of the required components.</p>	<p>CF-3 OPEN</p> <p>Adequate evidence of in-service training was provided, however institutional monitoring was insufficient. CF-3 will remain open.</p>

Finding	CAP Evaluation Outcome
<p><u>CHRONIC ILLNESS CLINICS</u></p> <p>CF-4: In 7 of 10 records reviewed, inmates were seen at intervals less frequently than required by their M-grade classification.</p>	<p>Provide in-service training to staff regarding the issue(s) identified in the Finding(s) column.</p> <p>Create a monitoring tool and conduct biweekly monitoring of no less than ten applicable records to evaluate the effectiveness of corrections.</p> <p>Continue monitoring until closure is affirmed through the CMA corrective action plan assessment.</p>

B. Annex

The CAP closure files revealed sufficient evidence to determine that 11 of the 32 physical health findings were corrected. Twenty-one physical health findings will remain open and one physical health finding was added for in-service training, monitoring, and corrective action.

Finding	CAP Evaluation Outcome
<p><u>CHRONIC ILLNESS CLINIC RECORD REVIEW</u></p> <p>A comprehensive review of 15 records revealed the following deficiencies:</p> <p>PH-2: In 9 records, baseline information was incomplete or missing.</p> <p>PH-3: In 4 records, inmates were not seen as often as the clinician determined necessary or were seen at intervals greater than 365 days.</p> <p>PH-4: In 4 records, there was no evidence labs were available to the clinician or reviewed prior to clinic visits.</p> <p>PH-5: In 7 records, CIC forms and progress notes were not complete, legible, dated, timed, signed and/or signature stamped.</p>	<p>PH-2 CLOSED</p> <p>Adequate evidence of in-service training and documentation of correction were provided to close PH-2.</p> <p>PH-3 & PH-4 OPEN</p> <p>Adequate evidence of in-service training was provided, however institutional monitoring indicated an acceptable level of compliance had not been met. PH-3 & PH-4 will remain open.</p> <p>PH-5 CLOSED</p> <p>Adequate evidence of in-service training and documentation of correction were provided to close PH-5.</p>

Finding	CAP Evaluation Outcome
<p><u>ENDOCRINE CLINIC</u></p> <p>A comprehensive review of 17 records revealed the following deficiencies:</p> <p>PH-6: In 4 of 13 applicable records, there was no evidence of the annual fundoscopic examination.</p> <p>PH-7: In 4 of 9 applicable records, there was no evidence that patients with HbA1c over 8.0 were seen every 3 months.</p> <p>PH-8: In 3 of 12 applicable records, ACE/ARB therapy was not initiated for diabetic inmates experiencing hypertension.</p>	<p>PH-6 OPEN</p> <p>Adequate evidence of in-service training was provided, however a review of randomly selected records indicated an acceptable level of compliance had not been met. PH-6 will remain open.</p> <p>PH-7 & PH-8 OPEN</p> <p>Adequate evidence of in-service training was provided, however institutional monitoring indicated an acceptable level of compliance had not been met. PH-7 & PH-8 will remain open.</p>

Finding	CAP Evaluation Outcome
<p><u>GASTROINTESTINAL CLINIC</u></p> <p>A comprehensive review of 17 records revealed the following deficiencies:</p> <p>PH-9: In 5 records, there was no evidence that inmates had an annual urinalysis.</p> <p>PH-10: In 9 of 12 applicable records, there was no evidence that hepatitis A & B vaccines were given to inmates with hepatitis C infection and no prior history of A & B infection.</p> <p>PH-11: In 3 of 13 applicable records, there was no evidence of pneumococcal vaccine or refusal.</p> <p>PH-12: In 4 records, there was no evidence of influenza vaccine or refusal.</p>	<p>PH-9 CLOSED</p> <p>Adequate evidence of in-service training and documentation of correction were provided to close PH-9.</p> <p>PH-10, PH-11, & PH-12 OPEN</p> <p>Adequate evidence of in-service training was provided, however institutional monitoring indicated an acceptable level of compliance had not been met. PH-10, PH-11, & PH-12 will remain open.</p>

Finding	CAP Evaluation Outcome
<p><u>MISCELLANEOUS CLINIC</u></p> <p>PH-14: In 3 of 13 records reviewed, there was no evidence of pneumococcal vaccine or refusal.</p>	<p>PH-14 CLOSED</p> <p>Adequate evidence of in-service training and documentation of correction were provided to close PH-14.</p>

Finding	CAP Evaluation Outcome
<p><u>IMMUNITY CLINIC</u></p> <p>A comprehensive review of 14 records revealed the following deficiencies:</p> <p>PH-15: In 6 records, there was no evidence of hepatitis B vaccine or refusal.</p> <p>PH-16: In 3 records, there was no evidence of influenza vaccine or refusal.</p>	<p>PH-15 & PH-16 CLOSED</p> <p>Adequate evidence of in-service training and documentation of correction were provided to close PH-15 & PH-16.</p>

Finding	CAP Evaluation Outcome
<p><u>NEUROLOGY CLINIC</u></p> <p>PH-18: In 4 of 13 applicable records (16 reviewed), there was no evidence that abnormal labs were addressed in a timely manner.</p>	<p>PH-18 OPEN</p> <p>Adequate evidence of in-service training was provided, however institutional monitoring indicated an acceptable level of compliance had not been met. PH-18 will remain open.</p>

Finding	CAP Evaluation Outcome
<p><u>ONCOLOGY CLINIC</u></p> <p>PH-21: In 1 of 4 records reviewed, there was no referral to a specialist although indicated.</p>	<p>PH-21 OPEN</p> <p>Adequate evidence of in-service training was provided, however institutional monitoring indicated an acceptable level of compliance had not been met. PH-21 will remain open.</p>

Finding	CAP Evaluation Outcome
<p><u>RESPIRATORY CLINIC</u></p> <p>PH-22: In 11 of 13 records reviewed, there was no evidence that reactive airway disease was classified as mild, moderate, or severe.</p>	<p>PH-22 OPEN</p> <p>Adequate evidence of in-service training was provided, however a review of randomly selected records indicated an acceptable level of compliance had not been met. PH-22 will remain open.</p>

Finding	CAP Evaluation Outcome
<p><u>TUBERCULOSIS CLINIC</u></p> <p>A comprehensive review of 7 records revealed the following deficiencies:</p> <p>PH-23: In 4 records, the diagnosis was not recorded on the problem list.</p> <p>PH-25: In 4 records, there was no documentation of monthly nursing follow-up.</p> <p>PH-26: In 3 records, there was no evidence the correct number of doses of INH were given.</p>	<p>PH-23 OPEN</p> <p>Adequate evidence of in-service training was provided, however a review of randomly selected records indicated an acceptable level of compliance had not been met. PH-23 will remain open.</p> <p>PH-25 CLOSED</p> <p>Adequate evidence of in-service training and documentation of correction were provided to close PH-25.</p>

Finding	CAP Evaluation Outcome
	<p>PH-26 OPEN</p> <p>Adequate evidence of in-service training was provided, however a review of randomly selected records indicated an acceptable level of compliance had not been met. PH-26 will remain open.</p>

Finding	CAP Evaluation Outcome
<p><u>INFIRMARY</u></p> <p>A comprehensive review of 15 records revealed the following deficiencies:</p> <p>PH-28: In 5 records, there was no evidence the clinician provided complete and appropriate care orders.</p> <p>PH-29: In 6 records, there was no evidence of a discharge note.</p> <p>PH-30: In 3 records, the separate inpatient chart was incomplete.</p>	<p>PH-28, PH-29, & PH-30 CLOSED</p> <p>Adequate evidence of in-service training and documentation of correction were provided to close PH-28, PH-29, & PH-30.</p>

Finding	CAP Evaluation Outcome
<p><u>CONSULTATIONS</u></p> <p>A comprehensive review of 15 records revealed the following deficiencies:</p> <p>PH-33: In 3 records, there was no evidence that the consultation occurred timely.</p> <p>PH-34: In 11 records, the diagnosis was not reflected on the problem list.</p>	<p>PH-33 & PH-34 OPEN</p> <p>Adequate evidence of in-service training was provided, however a review of randomly selected records indicated an acceptable level of compliance had not been met. PH-33 & PH-34 will remain open.</p>

Finding	CAP Evaluation Outcome
<p><u>INTRA-SYSTEM TRANSFERS</u></p> <p>A comprehensive review of 13 records revealed the following deficiencies:</p> <p>PH-36: In 2 of 6 applicable records, inmates assigned to chronic illness clinics were not seen as scheduled or as necessary upon transfer.</p> <p>PH-37: In 6 records, there was no evidence the clinician reviewed the inmate's health record within 7 days.</p>	<p>PH-36 & PH-37 OPEN</p> <p>Adequate evidence of in-service training was provided, however a review of randomly selected records indicated an acceptable level of compliance had not been met. PH-36 & PH-37 will remain open.</p>

Finding	CAP Evaluation Outcome
<p><u>MEDICAL INMATE REQUESTS</u></p> <p>PH-40: In 5 of 12 applicable records (17 reviewed), there was no documentation that the interview, appointment, callout, and/or test occurred as intended.</p>	<p>PH-40 OPEN</p> <p>Adequate evidence of in-service training was provided, however a review of randomly selected records indicated an acceptable level of compliance had not been met. PH-40 will remain open.</p>

Finding	CAP Evaluation Outcome
<p><u>MEDICATION ADMINISTRATION RECORD REVIEW</u></p> <p>PH-41: In 1 of 2 applicable records, there was no evidence of counseling after missing three consecutive doses of medications.</p>	<p>PH-41 CLOSED</p> <p>Adequate evidence of in-service training and documentation of correction were provided to close PH-41.</p>

Finding	CAP Evaluation Outcome
<p><u>PERIODIC SCREENINGS</u></p> <p>A comprehensive review of 15 records revealed the following deficiencies:</p> <p>PH-42: In 3 records, the screening encounter did not occur within one month of the due date.</p> <p>PH-44: In 6 records, there was no evidence required diagnostic tests were performed 7-14 days prior to the screening.</p>	<p>PH-42 OPEN</p> <p>Adequate evidence of in-service training was provided, however institutional monitoring indicated an acceptable level of compliance had not been met. PH-42 will remain open.</p> <p>PH-43 OPEN</p> <p>Adequate evidence of in-service training was provided, however a review of randomly selected records indicated an acceptable level of compliance had not been met. PH-43 will remain open.</p>

Finding	CAP Evaluation Outcome
<p><u>CHRONIC ILLNESS CLINICS (CIC)</u></p> <p>CF-1: In 10 of 10 records reviewed, the physical examinations did not contain all of the required components.</p>	<p>CF-1 OPEN</p> <p>Adequate evidence of in-service training was provided, however institutional monitoring was insufficient. CF-1 will remain open.</p>

Finding	CAP Evaluation Outcome
<p><u>CHRONIC ILLNESS CLINICS</u></p> <p>CF-2: In 5 of 10 records reviewed, inmates were seen at intervals less frequently than required by their M-grade classification.</p>	<p>Provide in-service training to staff regarding the issue(s) identified in the Finding(s) column.</p> <p>Create a monitoring tool and conduct biweekly monitoring of no less than ten applicable records to evaluate the effectiveness of corrections.</p> <p>Continue monitoring until closure is affirmed through the CMA corrective action plan assessment.</p>

III. Mental Health Assessment Summary

A. Main Unit

The CAP closure files revealed sufficient evidence to determine that 1 of 7 mental health findings were corrected. Six mental health findings will remain open.

Finding	CAP Evaluation Outcome
<p><u>USE OF FORCE</u></p> <p>MH-3: In 4 of 7 records reviewed, a written referral to mental health by physical health staff was not present.</p>	<p>MH-3 CLOSED</p> <p>Adequate evidence of in-service training and documentation of correction were provided to close MH-3.</p>

Finding	CAP Evaluation Outcome
<p><u>OUTPATIENT PSYCHOTROPIC MEDICATION PRACTICES</u></p> <p>A comprehensive review of 19 outpatient records revealed the following deficiencies:</p> <p>MH-8: In 8 of 13 applicable records, follow-up lab tests were not completed as required.</p> <p>MH-11: In 3 of 15 applicable records, there was no evidence the nurse met with inmates who refused medication for 2 consecutive days.</p> <p>MH-12: In 1 of 3 applicable records, there was no DC4-711A “Refusal of Health Care Services” after 3 consecutive medication refusals or 5 in one month.</p> <p>MH-14: In 8 records, follow-up psychiatric contacts were not conducted at appropriate intervals.</p>	<p>MH-8 OPEN</p> <p>Adequate evidence of in-service training was provided, however a review of randomly selected records indicated an acceptable level of compliance had not been met. MH-8 will remain open.</p> <p>MH-11, MH-12, & MH-14 OPEN</p> <p>Adequate evidence of in-service training was provided, however institutional monitoring indicated an acceptable level of compliance had not been met. MH-11, MH-12, & MH-14 will remain open.</p>

Finding	CAP Evaluation Outcome
<p><u>OUTPATIENT MENTAL HEALTH SERVICES</u></p> <p>A comprehensive review of 17 outpatient records revealed the following deficiencies:</p> <p>MH-19: In 5 of 15 applicable records, the ISP was not signed by a member or members of the multidisciplinary treatment team (MDST) and/or inmate or a refusal was not documented on form DC4-711A.</p> <p>MH-20: In 3 of 13 applicable records, the ISP was not reviewed or revised at the 180 day interval.</p>	<p>MH-19 & MH-20 OPEN</p> <p>Adequate evidence of in-service training was provided, however institutional monitoring indicated an acceptable level of compliance had not been met. MH-19 & MH-20 will remain open.</p>

B. Annex

The CAP closure files revealed evidence to determine that 7 of 12 mental health findings were corrected. Five mental health findings will remain open

Finding	CAP Evaluation Outcome
<p><u>SELF-HARM OBSERVATION STATUS (SHOS)</u></p> <p>MH-8: In 12 of 24 records reviewed, the DC4-673B “Inpatient Mental Health Daily Nursing Evaluation” was not completed once per shift.</p>	<p>MH-8 CLOSED</p> <p>Adequate evidence of in-service training and documentation of correction were provided to close MH-8.</p>

Finding	CAP Evaluation Outcome
<p><u>USE OF FORCE</u></p> <p>A comprehensive review of 7 use of force episodes revealed the following deficiencies:</p> <p>MH-11: In 2 of 2 applicable records, the post use of force physical exam was not completed in its entirety.</p> <p>MH-12: In all records, a written referral to mental health by physical health staff was not present.</p>	<p>MH-11 & MH-12 CLOSED</p> <p>Adequate evidence of in-service training and documentation of correction were provided to close MH-11 & MH-12.</p>

Finding	CAP Evaluation Outcome
<p><u>SPECIAL HOUSING</u></p> <p>MH-15: In 7 of 8 applicable records (18 reviewed), psychotropic medications were not continued as directed while the inmate was held in special housing.</p>	<p>MH-15 CLOSED</p> <p>Adequate evidence of in-service training and documentation of correction were provided to close MH-15.</p>

Finding	CAP Evaluation Outcome
<p><u>OUTPATIENT PSYCHOTROPIC MEDICATION PRACTICES</u></p> <p>A comprehensive review of 14 outpatient records revealed the following deficiencies:</p> <p>MH-18: In 8 of 13 applicable records, the inmate did not receive medications as prescribed and documentation of refusal was not present in the medical record.</p> <p>MH-19: In 4 of 6 applicable records, there was no evidence the nurse met with</p>	<p>MH-18 CLOSED</p> <p>Adequate evidence of in-service training and documentation of correction were provided to close MH-18.</p> <p>MH-19 & MH-20 OPEN</p> <p>Adequate evidence of in-service training was provided, however institutional monitoring indicated an acceptable level of compliance had</p>

Finding	CAP Evaluation Outcome
<p>inmates who refused medication for 2 consecutive days.</p> <p>MH-20: In 4 records, follow-up psychiatric contacts were not conducted at appropriate intervals.</p>	<p>not been met. MH-19, & MH-20 will remain open.</p>

Finding	CAP Evaluation Outcome
<p><u>OUTPATIENT MENTAL HEALTH SERVICES</u></p> <p>A comprehensive review of 17 outpatient records revealed the following deficiencies:</p> <p>MH-23: In 3 of 8 applicable records, the DC4-760A “Health Information Arrival/Transfer Summary” was incomplete or missing.</p> <p>MH-24: In 3 of 4 applicable records, psychiatric medication was not continued upon the inmate’s arrival at the institution.</p> <p>MH-25: In 8 records, the ISP was not signed by the inmate and a refusal was not documented on form DC4-711A.</p> <p>MH-26: In 5 records, mental health problems were not recorded on the problem list.</p>	<p>MH-23 OPEN</p> <p>Adequate evidence of in-service training was provided, however a review of randomly selected records indicated an acceptable level of compliance had not been met. MH-23 will remain open.</p> <p>MH-24 CLOSED</p> <p>Adequate evidence of in-service training and documentation of correction were provided to close MH-24.</p> <p>MH-25 OPEN</p> <p>Adequate evidence of in-service training was provided, however institutional monitoring indicated an acceptable level of compliance had not been met. MH-25 will remain open.</p> <p>MH-26 CLOSED</p> <p>Adequate evidence of in-service training and documentation of correction were provided to close MH-26.</p>

Finding	CAP Evaluation Outcome
<p><u>AFTERCARE PLANNING</u></p> <p>MH-28: In 2 of 10 records, the DC4-661 “Summary of Outpatient Mental Health Care” was not completed within 30 days of end of sentence (EOS).</p>	<p>MH-28 OPEN</p> <p>Adequate evidence of in-service training was provided, however institutional monitoring indicated an acceptable level of compliance had not been met. MH-28 will remain open.</p>

IV. Conclusion

Physical Health-Main Unit

The following physical health findings will close: PH-16, PH-22, PH-23, PH-24, PH-29, & PH-35. All other physical health findings will remain open. CF-4 will be added for in-service training, monitoring, and corrective action.

Physical Health-Annex

The following physical health findings will close: PH-2, PH-5, PH-9, PH-14, PH-15, PH-16, PH-25, PH-28, PH-29, PH-30, & PH-41. All other physical health findings will remain open. CF-2 will be added for in-service training, monitoring, and corrective action.

Mental Health-Main Unit

The following mental health findings will close: MH-3. All other mental health findings will remain open.

Mental Health-Annex

The following mental health findings will close: MH-8, MH-11, MH-12, MH-15, MH-18, MH-24, & MH-26. All other mental health findings will remain open

Until such time as appropriate corrective actions are undertaken by LOWCI staff and the results of those corrections reviewed by the CMA, this CAP will remain open. As some of the necessary steps to correct findings require further institutional monitoring, closure may take as long as three months. Follow-up assessment by the CMA will most likely take place through an on-site evaluation.
