CAP Assessment Distributed on September 19, 2018

CAP Assessment of Marion Correctional Institution

I. Overview

On January 9-11, 2018, the Correctional Medical Authority (CMA) conducted an on-site physical and mental health survey of Marion Correctional Institution (MARCI). The survey report was distributed on February 9, 2018. In March 2018, MARCI submitted and the CMA approved, the institutional corrective action plan (CAP) which outlined the efforts to be undertaken to address the findings of the January 2018 survey. These efforts included in-service training, physical plant improvements, and the monitoring of applicable medical records for a period of no less than ninety days.

On June 20, 2018, CMA staff requested access to monitoring documents to assist in determining if an on-site or off-site assessment should be conducted. Based on the documents provided, CMA staff conducted an on-site CAP assessment on September 11, 2018 to evaluate the effectiveness of corrective actions taken by institutional staff. Items II and III below describe the outcome of the CMA's evaluation of the institution's efforts to address the survey findings.

II. Physical Health Assessment Summary

The CAP closure files revealed sufficient evidence to determine that 0 of the 12 physical health findings were corrected. Twelve physical health findings will remain open.

Finding	CAP Evaluation Outcome
ENDOCRINE CLINIC REVIEW	PH-1 OPEN
PH-1: In 1 of 2 applicable records (13 reviewed), inmates with HgbA1c over 8.0 were not seen every three months as required.	Adequate evidence of in-service training was provided, however institutional monitoring was inadequate and the level of compliance could not be determined. PH-1 will remain open.

Finding	CAP Evaluation Outcome
GASTROINTESTINAL CLINIC	PH-2 & PH-3 OPEN
A comprehensive review of 15 inmate records revealed the following deficiencies:	Adequate evidence of in-service training was provided, however institutional monitoring was inadequate and the level of
PH-2: In 2 of 2 applicable records, inmates with known or suspected cirrhosis were not screened for hepatocellular cancer.	compliance could not be determined. PH-2 & PH-3 will remain open.

Finding	CAP Evaluation Outcome
PH-3: In 3 records, there was no evidence of hepatitis A or B vaccination or refusal.	

Finding	CAP Evaluation Outcome
NEUROLOGY CLINIC	PH-4 OPEN
PH-4: In 3 of 10 records, there was no evidence that seizures were classified as primary generalized (tonic-clonic, grand mal), primary or simple absence (petit mal), simple partial seizures, or complex partial seizures.	Adequate evidence of in-service training was provided, however institutional monitoring was inadequate and the level of compliance could not be determined. PH-4 will remain open.

Finding	CAP Evaluation Outcome
INFIRMARY CLINIC	PH-5 & PH-6 OPEN
A comprehensive review of 12 inmate records revealed the following deficiencies:	Adequate evidence of in-service training was provided, however institutional monitoring was inadequate and the level of
PH-5: In 1 of 4 applicable records, there was no evidence of weekend and/or holiday phone rounds.	compliance could not be determined. PH-5 & PH-6 will remain open.
PH-6: In 2 of 7 applicable records, there was no evidence of a discharge summary completed by the clinician.	

Finding	CAP Evaluation Outcome
CONSULTATIONS	PH-7 OPEN
PH-7: In 9 of 12 records reviewed, the diagnosis was not recorded on the problem list.	Adequate evidence of in-service training was provided, however institutional monitoring was inadequate and the level of compliance could not be determined. PH-7 will remain open.

Finding	CAP Evaluation Outcome
MEDICATION ADMINISTRATION RECORD REVIEW	PH-8 & PH-9 OPEN
A comprehensive review of 14 records revealed the following deficiencies:	Adequate evidence of in-service training was provided, however institutional monitoring was inadequate and the level of
PH-8: In 3 records, there was no evidence of a corresponding note in the medical record by the provider.	compliance could not be determined. PH-8 & PH-9 will remain open.
PH-9: In 3 records, the documentation on the medication administration record (MAR) was inadequate.	

Finding	CAP Evaluation Outcome
DENTAL SYSTEMS	PH-10 OPEN
PH-10: There was no evidence of appropriate autoclave testing.	Institutional monitoring was inadequate and the level of compliance could not be determined. PH-10 will remain open.

Finding	CAP Evaluation Outcome
INSTITUTIONAL TOUR	PH-11 & PH-12 OPEN
A tour of the facility revealed the following deficiencies:	Institutional monitoring was inadequate and the level of compliance could not be determined.
PH-11: The log for the medical refrigerator was not adequately maintained.	PH-11 & PH-12 will remain open.
PH-12: There was no evidence of regular glucometer testing.	

III. Mental Health Assessment Summary

The CAP closure files revealed evidence to determine that 0 of 16 mental health findings were corrected. Sixteen mental health finding will remain open.

Finding	CAP Evaluation Outcome
SELF-HARM OBSERVATION STATUS (SHOS) A comprehensive review of 4 records revealed the following deficiencies: MH-1: In 1 record, an emergency evaluation was not completed by mental health or nursing staff prior to an SHOS admission. MH-2: In 1 record, the daily nursing assessment was not completed. MH-3: In 2 records, mental health staff did not provide post-discharge follow-up within 7 days.	MH-1, MH-2, & MH-3 OPEN Adequate evidence of in-service training was provided, however institutional monitoring was inadequate and the level of compliance could not be determined. MH-1, MH-2, & MH-3 will remain open.

Finding	CAP Evaluation Outcome
USE OF FORCE	MH-4 & MH-5 OPEN
A comprehensive review of 9 records revealed the following deficiencies: MH-4: In 5 records, there was no evidence of a written referral by physical health staff to mental health.	Adequate evidence of in-service training was provided, however institutional monitoring was inadequate and the level of compliance could not be determined. MH-4 & MH-5 will remain open.
MH-5: In 6 records, there was no indication that mental health staff interviewed the inmate the next working day to determine the level of mental health care needed.	

Finding	CAP Evaluation Outcome
OUTPATIENT PSYCHOTROPIC MEDICATION PRACTICES A comprehensive review of 17 records revealed the following deficiencies:	MH-6 & MH-7 OPEN Adequate evidence of in-service training was provided, however institutional monitoring was inadequate and the level of
MH-6: In 7 of 16 applicable records, the inmate did not receive medications as prescribed or documentation of refusal was not present in the medical record.	compliance could not be determined. MH-6 & MH-7 will remain open.
MH-7: In 5 records, follow-up psychiatric contacts were not conducted at appropriate intervals.	

Finding	CAP Evaluation Outcome
OUTPATIENT MENTAL HEALTH SERVICES	MH-8, MH-9, MH-10, MH-11, MH-12, MH-13, MH-14, MH-15, & MH-16 OPEN
A comprehensive review of 18 records revealed the following deficiencies:	Adequate evidence of in-service training was provided, however institutional monitoring was inadequate and the level of compliance could not be determined. MH-8, MH-9, MH-10, MH-11, MH-12, MH-13, MH-14, MH-15, & MH-16 will remain open.
MH-8: In 5 of 8 applicable records, the Biopsychosocial Assessment (BPSA) was not approved by the Multi-Disciplinary Services Team (MDST) within 30 days of initiation of mental health services.	
MH-9: In 5 of 8 applicable records, the initial Individualized Service Plan (ISP) was not completed within 30 days of initiation of mental health services.	тетпант орет.
MH-10: In 7 of 16 applicable records, the ISP was not signed by the inmate.	
MH-11: In 5 records, mental health problems were not recorded on the problem list.	
MH-12: In 5 of 15 applicable records, there was no documentation that the inmate received the services listed on the ISP.	
MH-13: In 4 of 16 applicable records, counseling for inmates without evidence of a psychotic disorder was not provided or refused at least every 90 days.	
MH-14: In 1 of 2 applicable records, counseling for inmates with evidence of a psychotic disorder was not provided or refused at least every 30 days.	
MH-15: In 5 records, case management was not provided at least every 90 days.	
MH-16: In 5 records the frequency of clinical contacts was insufficient.	

IV. Conclusion

All physical and mental health findings remain open. Until such time as appropriate corrective actions are undertaken by staff and the results of those corrections reviewed by the CMA, this CAP will remain open. As some of the necessary steps to correct findings require further institutional monitoring, closure may take as long as three months. Follow-up assessment by the CMA will most likely take place through an on-site evaluation.
