## I. Overview

In July 2024, the Correctional Medical Authority (CMA) conducted an on-site physical and mental health survey of Okeechobee Correctional Institution (OKECI). The survey report was distributed on August 29, 2024. In September 2024, OKECI submitted, and the CMA approved, the institutional corrective action plan (CAP) which outlined the efforts to be undertaken to address the findings of the OKECI survey. These efforts included in-service training, physical plant improvements, and the monitoring of applicable medical records for a period of no less than ninety days. Items II and III below describe the outcome of the CMA's evaluation of the institution's efforts to address the survey findings.
