Distributed on October 28, 2024

I. Overview

On December 6-8, 2022, the Correctional Medical Authority (CMA) conducted an onsite physical and mental health survey of Polk Correctional Institution (POLCI). The survey report was distributed on January 18, 2023. In February 2023, POLCI submitted, and the CMA approved, the institutional corrective action plan (CAP) which outlined the efforts to be undertaken to address the findings of the POLCI survey. These efforts included in-service training, physical plant improvements, and the monitoring of applicable medical records for a period of no less than ninety days. Items II and III below describe the outcome of the CMA’s evaluation of the institution’s efforts to address the survey findings.

Summary of CAP Assessments for Polk Correctional Institution

II. Physical Health Assessment Summary

The CAP closure files revealed sufficient evidence to determine that 0 of the 2 physical health findings were corrected. Two physical health findings remain open.

Finding	Closed	Open: Evaluation of records indicated an acceptable level of compliance was not met	Open: No episodes were available for review	Open: Institutional monitoring was inadequate	Open: Institutional monitoring indicated compliance was not met
Periodic Screenings Screen 3: All diagnostic tests are completed prior to the periodic screening encounter		X			

Finding	Closed	Open: Evaluation of records indicated an acceptable level of compliance was not met	Open: No episodes were available for review	Open: Institutional monitoring was inadequate	Open: Institutional monitoring indicated compliance was not met
<p><u>PREA Medical Review</u> Screen 4: Prophylactic treatment and follow-up care for STIs are given as indicated</p>					X

III. Mental Health Assessment Summary

All findings were closed at the first CAP assessment.

IV. Conclusion

Until appropriate corrective actions are undertaken by POLCI staff, and the results of those corrections reviewed by the CMA, this CAP will remain open. As some of the necessary steps to correct findings require further institutional monitoring, closure may take as long as three months. Follow-up assessment by the CMA will most likely take place through an off-site evaluation.
