## BACKGROUND AND SCOPE

The Correctional Medical Authority (CMA) is required, per § 945.6031(2) F.S., to conduct triennial surveys of the physical and mental health care systems at each correctional institution and report survey findings to the Secretary of Corrections. The process is designed to assess whether inmates in Florida Department of Corrections (FDC) institutions can access medical, dental, and mental health care and to evaluate the clinical adequacy of the resulting care.

The goals of institutional surveys are:

- 1) to determine if the physical, dental, and mental health care provided to inmates in all state public and privately operated correctional institutions is consistent with state and federal law, conforms to standards developed by the CMA, is consistent with the standards of care generally accepted in the professional health care community at large.
- 2) to promote ongoing improvement in the correctional system of health services; and,
- 3) to assist the Department in identifying mechanisms to provide cost effective health care to inmates.

To achieve these goals, specific criteria designed to evaluate inmate care and treatment in terms of effectiveness and fulfillment of statutory responsibility are measured. They include determining whether:

- Inmates have adequate access to medical and dental health screening and evaluation and to ongoing preventative and primary health care.
- Inmates receive adequate and appropriate mental health screening, evaluation, and classification.
- Inmates receive complete and timely orientation on how to access physical, dental, and mental health services.
- Inmates have adequate access to medical and dental treatment that results in the remission of symptoms or in improved functioning.
- Inmates receive adequate mental health treatment that results in or is consistent with the remission of symptoms, improved functioning relative to their current environment and reintegration into the general prison population as appropriate.
- Inmates receive and benefit from safe and effective medication, laboratory, radiology, and dental practices.
- Inmates have access to timely and appropriate referral and consultation services.
- Psychotropic medication practices are safe and effective.
- Inmates are free from the inappropriate use of restrictive control procedures.
- Sufficient documentation exists to provide a clear picture of the inmate's care and treatment.
- There are enough qualified staff to provide adequate treatment.

## METHODOLOGY

During a multi-day site visit, the CMA employs a standardized monitoring process to evaluate the quality of physical and mental health services provided at this institution, identify significant deficiencies in care and treatment, and assess institutional compliance with FDC's policies and procedures.

This process consists of:

- Information gathering prior to monitoring visit (Pre-survey Questionnaire)
- On-site review of clinical records and administrative documentation
- Institutional tour
- Inmate and staff interviews

The CMA contracts with a variety of licensed community and public health care practitioners including physicians, psychiatrists, dentists, nurses, psychologists, and other licensed mental health professionals to conduct these surveys. CMA surveyors utilize uniform survey tools, based on FDC's Office of Health Services (OHS) policies and community health care standards, to evaluate specific areas of physical and mental health care service delivery. These tools assess compliance with commonly accepted policies and practices of medical record documentation.

The CMA employs a record selection methodology using the Raosoft Calculation method. This method ensures a 15 percent margin of error and an 80 percent confidence level. Records are selected in accordance with the size of the clinic or assessment area being evaluated.

Compliance scores are calculated by dividing the sum of all yes responses by the sum of all yes and no responses (***rating achieved/possible rating***) and are expressed as a percentage. Institutional tours and systems evaluations are scored as compliant or non-compliant. Individual screens with a compliance percentage below 80%, as well as tour and systems requirements deemed non-compliant will require completion of the CMA's corrective action process (CAP) and are highlighted in red.

## INSTITUTIONAL DEMOGRAPHICS AND STAFFING

Gulf Correctional Institution (GULCI) houses male inmates of minimum, medium, and close custody levels. The facility grades are medical (M) grades 1, 2, 3, 4, and 5 and psychology (S) grades 1 and 2. GULCI consists of a Main Unit.<sup>1</sup>

## GULF CORRECTIONAL INSTITUTION SURVEY SUMMARY

The CMA conducted a thorough review of the medical, mental health, and dental systems at GULCI on January 7-9, 2025. Record reviews evaluating the provision and documentation of care were also conducted. Additionally, a review of administrative processes and a tour of the physical plant were conducted.

Detailed below are results from the institutional survey of GULCI. The results are presented by assessment area and for each screen of the monitoring tool. Compliance percentages are provided for each screen.

9 Inmates returning from an outside hospital are evaluated by the clinician within one business day	0	0	0	18	N/A
<b>Overall Compliance Score 95%</b>					

### Emergency Services Discussion:

Screen 6: In the first record, the inmate was seen in response to complaints of a spider bite on 11/14/24. The inmate was seen again in the emergency clinic on 11/18/24 with the same complaints. On that date, the provider reviewed the culture results and ordered antibiotic treatment. The inmate returned to the clinic on 11/26/24 and indicated they had not received the antibiotics, which the provider "reordered." In the second record, the inmate presented to the emergency clinic on 11/29/24 with complaints of a foreign object in the right eye. Medical staff indicated that the inmate would be placed on the call-out list by 12/1/24 to follow-up with the provider. The inmate was transferred on 12/17/24 without the required follow-up.

## Interview Summaries

### ***INMATE INTERVIEWS***

Thirteen inmates agreed to participate in interviews with CMA staff. Overall, inmates were familiar with how to access medical, dental, and mental health services. Inmates in both general population and confinement housing denied difficulty in obtaining prescribed medications. Although, many inmates reported over-the-counter medications were usually available in the dorm, they reported that security staff often refuse to provide them.

Overall, inmates reported dissatisfaction with access to medical care. The majority of inmates interviewed reported sick call forms were not always available in the dorms. Several inmates reported they had to use an inmate request form because they were unable to obtain sick call forms. The requests were returned with the response indicating they should be resubmitted on the correct form. Several inmates reported their submitted sick call slips and/or inmate requests were never acknowledged. Others reported that it can take anywhere from a few days to a month to be seen. One inmate stated that while in confinement nurses picked up the sick call requests but did not sign or return the pink slips. Nearly half the inmates receiving regular lab work reported they are not given results. Most of the inmates interviewed reported poor communication with medical staff.

Most of the inmates on the mental health caseload were satisfied with their care and indicated that mental health staff listen and are helpful. They suggested more mental health staff would be beneficial. Those that had received dental services at the institution were satisfied with their care; however, most voiced complaints about the length of time it takes to be seen after placing a sick call or dental emergency. A few inmates reported waiting months to get on the dental plan.

### ***MEDICAL STAFF INTERVIEWS***

Six members of the medical team participated in interviews including nurses, clinical, and administrative staff. All were knowledgeable about policies and procedures directing the provision of health care at this institution. Staff was aware of emergency plans and reported that security personnel is cooperative and helpful when assistance is required. The majority reported that additional nursing staff would be helpful. Several staff indicated that the population that they serve is difficult and there are many emergencies due to the violence at this institution. Overall, they indicated they work well together and were motivated to provide good clinical services.

### ***MENTAL HEALTH STAFF INTERVIEWS***

One mental health professional (MHP) was interviewed. The MHP appeared knowledgeable and dedicated to meeting the needs of the inmates on the caseload. The MHP was easily able to describe the suicide and self-harm prevention techniques used and reported sufficient training for employees.

### ***SECURITY STAFF INTERVIEWS***

Three correctional officers were interviewed. Security staff appeared knowledgeable about policies pertaining to the sick call process and the accessing of emergency and routine medical care. They correctly verbalized procedures that pertain to inmates being placed in special housing. Staff was knowledgeable about emergency care procedures and the sick-call process.

All items that scored below 80% or were identified as non-compliant should be addressed through the corrective action process. Within 30 days of receiving the final copy of the CMA’s survey report, institutional staff must develop a corrective action plan (CAP) that addresses the deficiencies outlined in the report and in-service training should be conducted for all applicable findings. The CAP is then submitted to the Office of Health Services (OHS) for approval before it is reviewed and approved by CMA staff. Once approved, institutional staff implement the CAP and work towards correcting the findings.

Usually, four to five months after a CAP is implemented (but no less than three months) the CMA will evaluate the effectiveness of the corrective actions taken. Findings deemed corrected are closed and monitoring is no longer required. Conversely, findings not corrected remain open. Institutional staff will continue to monitor open findings until the next assessment is conducted, typically within three to four months. This process continues until all findings are closed.

## Recommendations

In addition to the needed corrective actions described above and based upon the comprehensive review of the physical, mental health, and administrative services at GULCI the CMA makes the following recommendations:

- Ensure consultations and specialty services are completed within the required time frame.
- Ensure clinician follow-up referrals from sick call appointments and emergency visits are performed timely.
- Ensure that service planning interviews are completed and documented as required.
