## BACKGROUND AND SCOPE

The Correctional Medical Authority (CMA) is required, per § 945.6031(2) F.S., to conduct triennial surveys of the physical and mental health care systems at each correctional institution and report survey findings to the Secretary of Corrections. The process is designed to assess whether inmates in Florida Department of Corrections (FDC) institutions can access medical, dental, and mental health care and to evaluate the clinical adequacy of the resulting care.

The goals of institutional surveys are:

- 1) to determine if the physical, dental, and mental health care provided to inmates in all state public and privately operated correctional institutions is consistent with state and federal law, conforms to standards developed by the CMA, is consistent with the standards of care generally accepted in the professional health care community at large.
- 2) to promote ongoing improvement in the correctional system of health services; and,
- 3) to assist the Department in identifying mechanisms to provide cost effective health care to inmates.

To achieve these goals, specific criteria designed to evaluate inmate care and treatment in terms of effectiveness and fulfillment of statutory responsibility are measured. They include determining whether:

- Inmates have adequate access to medical and dental health screening and evaluation and to ongoing preventative and primary health care
- Inmates receive adequate and appropriate mental health screening, evaluation, and classification
- Inmates receive complete and timely orientation on how to access physical, dental, and mental health services
- Inmates have adequate access to medical and dental treatment that results in the remission of symptoms or in improved functioning
- Inmates receive adequate mental health treatment that results in or is consistent with the remission of symptoms, improved functioning relative to their current environment and reintegration into the general prison population as appropriate
- Inmates receive and benefit from safe and effective medication, laboratory, radiology, and dental practices
- Inmates have access to timely and appropriate referral and consultation services
- Psychotropic medication practices are safe and effective
- Inmates are free from the inappropriate use of restrictive control procedures
- There is sufficient documentation exists to provide a clear picture of the inmate's care and treatment
- There are enough qualified staff to provide adequate treatment

## METHODOLOGY

During a multi-day site visit, the CMA employs a standardized monitoring process to evaluate the quality of physical and mental health services provided at this institution, identify significant deficiencies in care and treatment, and assess institutional compliance with FDC's policies and procedures.

This process consists of:

- Information gathering prior to monitoring visit (Pre-survey Questionnaire)
- On-site review of clinical records and administrative documentation
- Institutional tour
- Inmate and staff interviews

The CMA contracts with a variety of licensed community and public health care practitioners including physicians, psychiatrists, dentists, nurses, psychologists, and other licensed mental health professionals to conduct these surveys. CMA surveyors utilize uniform survey tools, based on FDC's Office of Health Services (OHS) policies and community health care standards, to evaluate specific areas of physical and mental health care service delivery. These tools assess compliance with commonly accepted policies and practices of medical record documentation.

The CMA employs a record selection methodology using the Raosoft Calculation method. This method ensures a 15 percent margin of error and an 80 percent confidence level. Records are selected in accordance with the size of the clinic or assessment area being evaluated.

Compliance scores are calculated by dividing the sum of all yes responses by the sum of all yes and no responses (***rating achieved/possible rating***) and are expressed as a percentage. Institutional tours and systems evaluations are scored as compliant or non-compliant. Individual screens with a compliance percentage below 80%, as well as tour and systems requirements deemed non-compliant will require completion of the CMA's corrective action process (CAP) and are highlighted in red.

## INSTITUTIONAL DEMOGRAPHICS AND STAFFING

Lawtey Correctional Institutional (LAWCI) houses male inmates of minimum and medium custody levels. The facility grades are medical (M) grades 1, 2, 3, and 4, and psychology (S) grades 1 and 2. LAWCI consists of a Main Unit only.<sup>1</sup>

## LAWTEY CORRECTIONAL INSTITUTIONAL SURVEY SUMMARY

The CMA conducted a thorough review of the medical, mental health, and dental systems at LAWCI in November 2023. Record reviews evaluating the provision and documentation of care were also conducted. Additionally, a review of administrative processes and a tour of the physical plant were conducted.

Detailed below are results from the institutional survey of Lawtey Correctional. The results are presented by assessment area and for each screen of the monitoring tool. Compliance percentages are provided for each screen.

#### ***Self-Injury and Suicide Prevention Discussion:***

Inmates requiring Self-harm Observation Status (SHOS) are transferred to neighboring institutions. Therefore, multiple screens are not applicable.

Screen 4: Although inmates are transferred to neighboring intuitions for placement in SHOS, safety checks must be performed while they await transport. In these records, the observation checklists were not completed in their entirety.

## Interview Summaries

### ***INMATE INTERVIEWS***

Eleven inmates agreed to participate in interviews with CMA staff. Overall, inmates were familiar with how to access medical, dental, and mental health services and the majority reported no difficulties in receiving prescribed medications either in open population or confinement. Inmates reported they were seen timely for sick call requests and “right away” for emergencies. The majority of inmates receiving mental health services were satisfied with the care and indicated that mental health staff listen and are helpful. Those that had received dental services at the institution were complimentary of dental staff and the care they provided.

It should be noted that eight of the 11 inmates interviewed had similar complaints regarding the clinician. They reported that the clinician was “rude”, “mean”, “disrespectful”, “has an attitude”, and was “snappy”. Several reported the clinician yelled or “blew up” at them, and two reported the clinician cursed at them. Several reported they refuse medical care because they are afraid of the clinician. Conversely, inmates were complimentary of nursing, mental health and dental staff.

### ***MEDICAL STAFF INTERVIEWS***

Eight members of the medical team participated in interviews including nursing, clinical, and administrative staff. All were knowledgeable about policies and procedures directing the provision of health care at this institution. Staff was aware of emergency plans and reported that security personnel is cooperative and helpful when assistance is required.

Medical staff also reported inappropriate behavior from the clinical provider. For example, one staff member indicated inmates are “afraid to talk to her because she screams at them.” Another stated the clinician “yells at everybody”, “belittles them”, and “talks down to people.” Several indicated that these behaviors are not only directed towards inmates, but staff as well. Staff also reported that some inmates refuse to see the clinician and forgo needed medical services.

### ***MENTAL HEALTH STAFF INTERVIEWS***

The mental health professional works part time at Lawtey CI and was not onsite the day of the survey.

### ***SECURITY STAFF INTERVIEWS***

Two correctional officers were interviewed. Security staff appeared knowledgeable about policies pertaining to the sick call process and the accessing of emergency and routine medical care. Officers correctly verbalized procedures that pertain to inmates being placed in special housing.

All items that scored below 80% or were identified as non-compliant should be addressed through the corrective action process. Within 30 days of receiving the final copy of the CMA’s survey report, institutional staff must develop a corrective action plan (CAP) that addresses the deficiencies outlined in the report and in-service training should be conducted for all applicable findings. The CAP is then submitted to the Office of Health Services (OHS) for approval before it is reviewed and approved by CMA staff. Once approved, institutional staff implement the CAP and work towards correcting the findings.

Usually, four to five months after a CAP is implemented (but no less than three months) the CMA will evaluate the effectiveness of the corrective actions taken. Findings deemed corrected are closed and monitoring is no longer required. Conversely, findings not corrected remain open. Institutional staff will continue to monitor open findings until the next assessment is conducted, typically within three to four months. This process continues until all findings are closed.

## Recommendations

In addition to the needed corrective actions described above and based upon the comprehensive review of the physical, mental health, and administrative services at LAWCI, the CMA makes the following recommendations:

- Ensure that laboratory and diagnostic testing is completed as required for periodic screening encounters.
- Provide additional education to nursing staff on medication administration documentation and medication refusals.
- Explore and provide continuing education regarding clinician/patient and clinician/peer communication.
- Review procedures regarding the documentation of safety observations for inmates at risk of self-harm or violence towards others.
