Blair Jett, RN

Denise Sanfilippo, LCSW

Dynitia Brimm, LCSW

Tracy Davy, BS

Amy Castro, RN

Sue Porterfield, APRN

## **BACKGROUND AND SCOPE**

The Correctional Medical Authority (CMA) is required, per § 945.6031(2) F.S., to conduct triennial surveys of the physical and mental health care systems at each correctional institution and report survey findings to the Secretary of Corrections. The process is designed to assess whether inmates in Florida Department of Corrections (FDC) institutions can access medical, dental, and mental health care and to evaluate the clinical adequacy of the resulting care.

The goals of institutional surveys are:

- to determine if the physical, dental, and mental health care provided to inmates in all state public and privately operated correctional institutions is consistent with state and federal law, conforms to standards developed by the CMA, is consistent with the standards of care generally accepted in the professional health care community at large.
- 2) to promote ongoing improvement in the correctional system of health services; and,
- 3) to assist the Department in identifying mechanisms to provide cost effective health care to inmates.

To achieve these goals, specific criteria designed to evaluate inmate care and treatment in terms of effectiveness and fulfillment of statutory responsibility are measured. They include determining whether:

- Inmates have adequate access to medical and dental health screening and evaluation and to ongoing preventative and primary health care
- Inmates receive adequate and appropriate mental health screening, evaluation, and classification
- Inmates receive complete and timely orientation on how to access physical, dental, and mental health services
- Inmates have adequate access to medical and dental treatment that results in the remission of symptoms or in improved functioning
- Inmates receive adequate mental health treatment that results in or is consistent with the remission of symptoms, improved functioning relative to their current environment and reintegration into the general prison population as appropriate
- Inmates receive and benefit from safe and effective medication, laboratory, radiology, and dental practices
- Inmates have access to timely and appropriate referral and consultation services
- Psychotropic medication practices are safe and effective
- Inmates are free from the inappropriate use of restrictive control procedures
- There is sufficient documentation exists to provide a clear picture of the inmate's care and treatment
- There are enough qualified staff to provide adequate treatment

# **METHODOLOGY**

During a multi-day site visit, the CMA employs a standardized monitoring process to evaluate the quality of physical and mental health services provided at this institution, identify significant deficiencies in care and treatment, and assess institutional compliance with FDC's policies and procedures.

This process consists of:

- Information gathering prior to monitoring visit (Pre-survey Questionnaire)
- On-site review of clinical records and administrative documentation
- Institutional tour
- Inmate and staff interviews

The CMA contracts with a variety of licensed community and public health care practitioners including physicians, psychiatrists, dentists, nurses, psychologists, and other licensed mental health professionals to conduct these surveys. CMA surveyors utilize uniform survey tools, based on FDC's Office of Health Services (OHS) policies and community health care standards, to evaluate specific areas of physical and mental health care service delivery. These tools assess compliance with commonly accepted policies and practices of medical record documentation.

The CMA employs a record selection methodology using the Raosoft Calculation method. This method ensures a 15 percent margin of error and an 80 percent confidence level. Records are selected in accordance with the size of the clinic or assessment area being evaluated.

Compliance scores are calculated by dividing the sum of all yes responses by the sum of all yes and no responses (*rating achieved/possible rating*) and are expressed as a percentage. Institutional tours and systems evaluations are scored as compliant or non-compliant. Individual screens with a compliance percentage below 80%, as well as tour and systems requirements deemed non-compliant will require completion of the CMA's corrective action process (CAP) and are highlighted in red.

# INSTITUTIONAL DEMOGRAPHICS AND STAFFING

Madison Correctional Institution (MADCI) houses male inmates of minimum, medium, and close custody levels. The facility grades are medical (M) grades 1, 2 and 3, and psychology (S) grades 1 and 2. MADCI consists of a Main Unit and Work Camp.<sup>1</sup>

# MADISON CORRECTIONAL INSTITUTION

The CMA conducted a thorough review of the medical, mental health, and dental systems at MADCI on August 12-14, 2025. Record reviews evaluating the provision and documentation of care were also conducted. Additionally, a review of administrative processes and a tour of the physical plant were conducted.

Detailed below are results from the institutional survey of MADCI. The results are presented by assessment area and for each screen of the monitoring tool. Compliance percentages are provided for each screen.

## **Other Medical Records Review**

## Confinement Medical Review

#### **COMPLIANCE SCORE**

	SCREEN QUESTION	Total Applicable Records	YES	NO	N/A	Compliance Percentage	
1	Pre-confinement examinations are completed prior to placement in special housing	12	12	0	0	100%	
2	Risk Assessments for the Use of Chemical Restraint Agents are completed at the time of admission and the outcome is clinically appropriate	12	12	0	0	100%	
3	All active medications continue as ordered while inmates are held in special housing	6	1	5	6	17%	
4	Inmates are seen timely in the medical department for chronic illness clinic visits and dental appointments as ordered	2	2	0	10	100%	
5	Medical emergencies are responded to promptly and appropriately	1	1	0	11	100%	
6	Medical inmate requests are responded to timely and appropriately	2	2	0	10	100%	
7	All requests for sick-call (verbal or written) are triaged daily and responded to appropriately based on the complaint	1	1	0	11	100%	

**Overall Compliance Score 88%** 

## Confinement Medical Review Discussion:

Screen 3: In all of the deficient records, the health appraisal completed prior to the confinement admission did not indicate whether inmate's keep-on-person (KOP) medications accompanied them into confinement. CMA surveyors were unable to confirm that inmates had access to their medications during this time.

#### **Consultations**

		COMPLIANCE SCORE				
	SCREEN QUESTION	Total Applicable Records	YES	NO	N/A	Compliance Percentage
1	Consultations are requested in an appropriate time frame and the clinical information is sufficient to obtain the needed consultation	15	15	0	0	100%
2	Referrals were processed in a timely manner	15	15	0	0	100%

# **Interview Summaries**

#### **INMATE INTERVIEWS**

Twelve inmates agreed to participate in interviews. Overall, inmates were complementary of medical services and indicated sick call and emergency services were administered timely. Inmates denied difficulty in obtaining prescribed medications. However, many inmates reported that security staff refuses to dispense over-the-counter medications in the housing units. Inmates receiving dental services were complimentary of the care received.

Inmates reported they were satisfied with mental health services and were particularly complementary of the behavioral health specialist. They indicated that counseling and case management services were helpful in dealing with psychological symptoms and prison adjustment.

#### MEDICAL STAFF INTERVIEWS

Five members of the medical team participated in interviews. All were knowledgeable about policies and procedures directing the provision of health care at this institution. Staff were aware of emergency plans and reported that security staff is cooperative and helpful when assistance is required. Interviewees felt they work well as a team including security and mental health staff.

#### MENTAL HEALTH STAFF INTERVIEWS

One member of the mental health team participated in an interview. The behavioral health specialist appeared knowledgeable about the inmates on the caseload, demonstrated good clinical knowledge and was familiar with policies and procedures related to suicide and self-harm prevention techniques. Staff indicated they all work well together as a team to provide excellent care.

#### SECURITY STAFF INTERVIEWS

Three correctional officers were interviewed. Security staff appeared knowledgeable about policies pertaining to the sick call process and the accessing of emergency and routine medical care. They correctly verbalized procedures pertaining to inmates being placed in special housing. They described a good working relationship with medical and mental health staff.

All items that scored below 80% or were identified as non-compliant should be addressed through the corrective action process. Within 30 days of receiving the final copy of the CMA's survey report, institutional staff must develop a corrective action plan (CAP) that addresses the deficiencies outlined in the report and in-service training should be conducted for all applicable findings. The CAP is then submitted to the Office of Health Services (OHS) for approval before it is reviewed and approved by CMA staff. Once approved, institutional staff implement the CAP and work towards correcting the findings.

Usually, four to five months after a CAP is implemented (but no less than three months) the CMA will evaluate the effectiveness of the corrective actions taken. Findings deemed corrected are closed and monitoring is no longer required. Conversely, findings not corrected remain open. Institutional staff will continue to monitor open findings until the next assessment is conducted, typically within three to four months. This process continues until all findings are closed.

## Recommendations

In addition to the needed corrective actions described above and based upon the comprehensive review of the physical, mental health, and administrative services at MADCI the CMA makes the following recommendations:

- Ensure consultations and specialty services are completed within the required time frame.
- Ensure that laboratory and diagnostic testing is completed as required for periodic screening encounters.
- Ensure that inmates receive medications as prescribed, and documentation of KOP receipts is complete.
- Ensure that orders are received and implemented accordingly for infirmary admissions.
- Ensure that suicide prevention practices are conducted in compliance with Department standards.
