BACKGROUND AND SCOPE

The Correctional Medical Authority (CMA) is required, per § 945.6031(2) F.S., to conduct triennial surveys of the physical and mental health care systems at each correctional institution and report survey findings to the Secretary of Corrections. The process is designed to assess whether inmates in Florida Department of Corrections (FDC) institutions can access medical, dental, and mental health care and to evaluate the clinical adequacy of the resulting care.

The goals of institutional surveys are:

- 1) to determine if the physical, dental, and mental health care provided to inmates in all state public and privately operated correctional institutions is consistent with state and federal law, conforms to standards developed by the CMA, is consistent with the standards of care generally accepted in the professional health care community at large.
- 2) to promote ongoing improvement in the correctional system of health services; and,
- 3) to assist the Department in identifying mechanisms to provide cost effective health care to inmates.

To achieve these goals, specific criteria designed to evaluate inmate care and treatment in terms of effectiveness and fulfillment of statutory responsibility are measured. They include determining whether:

- Inmates have adequate access to medical and dental health screening and evaluation and to ongoing preventative and primary health care
- Inmates receive adequate and appropriate mental health screening, evaluation, and classification
- Inmates receive complete and timely orientation on how to access physical, dental, and mental health services
- Inmates have adequate access to medical and dental treatment that results in the remission of symptoms or in improved functioning
- Inmates receive adequate mental health treatment that results in or is consistent with the remission of symptoms, improved functioning relative to their current environment and reintegration into the general prison population as appropriate
- Inmates receive and benefit from safe and effective medication, laboratory, radiology, and dental practices
- Inmates have access to timely and appropriate referral and consultation services
- Psychotropic medication practices are safe and effective
- Inmates are free from the inappropriate use of restrictive control procedures
- There is sufficient documentation exists to provide a clear picture of the inmate's care and treatment
- There are enough qualified staff to provide adequate treatment

METHODOLOGY

During a multi-day site visit, the CMA employs a standardized monitoring process to evaluate the quality of physical and mental health services provided at this institution, identify significant deficiencies in care and treatment, and assess institutional compliance with FDC's policies and procedures.

This process consists of:

- Information gathering prior to monitoring visit (Pre-survey Questionnaire)
- On-site review of clinical records and administrative documentation
- Institutional tour
- Inmate and staff interviews

The CMA contracts with a variety of licensed community and public health care practitioners including physicians, psychiatrists, dentists, nurses, psychologists, and other licensed mental health professionals to conduct these surveys. CMA surveyors utilize uniform survey tools, based on FDC's Office of Health Services (OHS) policies and community health care standards, to evaluate specific areas of physical and mental health care service delivery. These tools assess compliance with commonly accepted policies and practices of medical record documentation.

The CMA employs a record selection methodology using the Raosoft Calculation method. This method ensures a 15 percent margin of error and an 80 percent confidence level. Records are selected in accordance with the size of the clinic or assessment area being evaluated.

Compliance scores are calculated by dividing the sum of all yes responses by the sum of all yes and no responses (**rating achieved/possible rating**) and are expressed as a percentage. Institutional tours and systems evaluations are scored as compliant or non-compliant. Individual screens with a compliance percentage below 80%, as well as tour and systems requirements deemed non-compliant will require completion of the CMA's corrective action process (CAP) and are highlighted in red.

INSTITUTIONAL DEMOGRAPHICS AND STAFFING

Martin Correctional Institution (MATCI) houses male inmates of minimum, medium, and close custody levels. The facility grades are medical (M) grades 1 and 2, and psychology (S) grades 1, 2, and 3. MATCI consists of a Main Unit.¹

MARTIN CORRECTIONAL INSTITUTION

The CMA conducted a thorough review of the medical, mental health, and dental systems at MATCI on July 14-16, 2025. Record reviews evaluating the provision and documentation of care were also conducted. Additionally, a review of administrative processes and a tour of the physical plant were conducted.

Detailed below are results from the institutional survey of MATCI. The results are presented by assessment area and for each screen of the monitoring tool. Compliance percentages are provided for each screen.

Consultation Services Discussion:

Screen 3: In seven records, routine consultations were not completed within 45 calendar days as required.

- In the first record, a gastrointestinal evaluation for an inmate with rectal polyps and a family history of colon cancer was requested on 3/4/25 and completed 6/27/25.
- In the second record, an orthopedic consult for the evaluation of a “non-healing of base of fourth finger and boutonniere deformity of fifth finger” was requested on 3/18/25 and completed 5/29/25.
- In the third record, a urological evaluation for an inmate with elevated prostate-specific antigen levels was requested on 2/10/25. The original appointment did not take place as intended due to a “scheduling issue.” The appointment is currently scheduled for 11/6/25.
- In the fourth record, a neurosurgical consultation for an inmate with severe spinal stenosis was requested on 10/1/24 and completed on 3/14/25.
- In the fifth record, a general surgery evaluation for a perianal fistula was requested 3/6/25 and completed on 7/14/25.
- In the sixth record, a cardiology consultation for an inmate with hypotension and syncopal episodes not responding to treatment was requested 2/21/25 and completed 5/15/25.
- In the seventh record, a neurosurgical evaluation for an inmate with spinal stenosis and intractable back pain was requested on 3/24/25. At this time of the survey, this consultation had not been completed.

Screen 6: In the first record, the orthopedist requested the inmate return to the clinic in two to four weeks. The appointment had not been scheduled as of the time of the survey. In the second record, the cardiologist requested the inmate return to the clinic in four weeks. However, the required follow-up was never initiated by the site medical provider.

PREA Discussion:

Screen 3: In this record, there was no evidence that HIV prophylaxis was offered to reduce the likelihood of possible infection.

Screen 7: In three records, the required mental health evaluation was not completed within the required time frame of one business day. In the fourth record, there was no evidence the evaluation was completed.

Screen 8: In the first record, the inmate presented as dysphoric and indicated that he was experiencing significant disruption in eating and sleeping. In the second record, the inmate refused the evaluation. The behavioral health specialist indicated that he would be rescheduled. However, there was no documentation that the appointment was rescheduled. In the third record, the inmate reported significant depression and anxiety, as well as difficulties with eating and sleeping. Additionally, he reported that he would like to be restarted on psychotropic medications. There was no evidence of mental health follow-up.

Interview Summaries

INMATE INTERVIEWS

Although, the majority of inmates interviewed expressed satisfaction with health care services at MATCI, there were several areas of common complaints that emerged. Three quarters of inmates interviewed reported that they had medical issues that had not been addressed. Additionally, five of 12 inmates reported submitting sick call slips that were never acknowledged, and four of 12 inmates reported that they were denied the opportunity to declare a medical or psychological emergency. Additionally, inmates in general population and in confinement settings reported difficulties in obtaining prescribed medications.

Overall, inmates on mental health caseload expressed satisfaction with mental health services. They indicated that counseling, case management and medication services were beneficial.

There were no reported complaints regarding the availability of dental services.

MEDICAL STAFF INTERVIEWS

Five members of the medical team participated in the interview process. All staff interviewed were knowledgeable about policies and procedures related to the accessing of health care services. Medical staff indicated they work well as a team. Overall, they reported a collegial relationship with security staff.

MENTAL HEALTH STAFF INTERVIEWS

Four members of the mental health staff agreed to participate in interviews. All team members were aware of policies and procedures related to the accessing of routine and emergency mental health services. Behavioral health specialists were knowledgeable about the inmates on their caseload.

SECURITY STAFF INTERVIEWS

Three correctional officers were interviewed. Officers appeared knowledgeable about policies pertaining to the sick call process and the accessing of emergency and routine medical care. They correctly verbalized procedures that pertain to inmates being placed in special housing.

All items that scored below 80% or were identified as non-compliant should be addressed through the corrective action process. Within 30 days of receiving the final copy of the CMA's survey report, institutional staff must develop a corrective action plan (CAP) that addresses the deficiencies outlined in the report and in-service training should be conducted for all applicable findings. The CAP is then submitted to the Office of Health Services (OHS) for approval before it is reviewed and approved by CMA staff. Once approved, institutional staff implement the CAP and work towards correcting the findings.

Usually, four to five months after a CAP is implemented (but no less than three months) the CMA will evaluate the effectiveness of the corrective actions taken. Findings deemed corrected are closed and monitoring is no longer required. Conversely, findings not corrected remain open. Institutional staff will continue to monitor open findings until the next assessment is conducted, typically within three to four months. This process continues until all findings are closed.

Recommendations

In addition to the needed corrective actions described above and based upon the comprehensive review of the physical, mental health, and administrative services at MATCI the CMA makes the following recommendations:

- Ensure that consultations are completed timely, and inmates have access to clinically appropriate specialty services.
- Ensure that medical and mental health care is appropriately provided to inmates after an alleged sexual battery.
