BACKGROUND AND SCOPE

The Correctional Medical Authority (CMA) is required, per § 945.6031(2) F.S., to conduct triennial surveys of the physical and mental health care systems at each correctional institution and report survey findings to the Secretary of Corrections. The process is designed to assess whether inmates in Florida Department of Corrections (FDC) institutions can access medical, dental, and mental health care and to evaluate the clinical adequacy of the resulting care.

The goals of institutional surveys are:

- 1) to determine if the physical, dental, and mental health care provided to inmates in all state public and privately operated correctional institutions is consistent with state and federal law, conforms to standards developed by the CMA, is consistent with the standards of care generally accepted in the professional health care community at large.
- 2) to promote ongoing improvement in the correctional system of health services; and,
- 3) to assist the Department in identifying mechanisms to provide cost effective health care to inmates.

To achieve these goals, specific criteria designed to evaluate inmate care and treatment in terms of effectiveness and fulfillment of statutory responsibility are measured. They include determining whether:

- Inmates have adequate access to medical and dental health screening and evaluation and to ongoing preventative and primary health care
- Inmates receive adequate and appropriate mental health screening, evaluation, and classification
- Inmates receive complete and timely orientation on how to access physical, dental, and mental health services
- Inmates have adequate access to medical and dental treatment that results in the remission of symptoms or in improved functioning
- Inmates receive adequate mental health treatment that results in or is consistent with the remission of symptoms, improved functioning relative to their current environment and reintegration into the general prison population as appropriate
- Inmates receive and benefit from safe and effective medication, laboratory, radiology, and dental practices
- Inmates have access to timely and appropriate referral and consultation services
- Psychotropic medication practices are safe and effective
- Inmates are free from the inappropriate use of restrictive control procedures
- There is sufficient documentation exists to provide a clear picture of the inmate's care and treatment
- There are enough qualified staff to provide adequate treatment

METHODOLOGY

During a multi-day site visit, the CMA employs a standardized monitoring process to evaluate the quality of physical and mental health services provided at this institution, identify significant deficiencies in care and treatment, and assess institutional compliance with FDC's policies and procedures.

This process consists of:

- Information gathering prior to monitoring visit (Pre-survey Questionnaire)
- On-site review of clinical records and administrative documentation
- Institutional tour
- Inmate and staff interviews

The CMA contracts with a variety of licensed community and public health care practitioners including physicians, psychiatrists, dentists, nurses, psychologists, and other licensed mental health professionals to conduct these surveys. CMA surveyors utilize uniform survey tools, based on FDC's Office of Health Services (OHS) policies and community health care standards, to evaluate specific areas of physical and mental health care service delivery. These tools assess compliance with commonly accepted policies and practices of medical record documentation.

The CMA employs a record selection methodology using the Raosoft Calculation method. This method ensures a 15 percent margin of error and an 80 percent confidence level. Records are selected in accordance with the size of the clinic or assessment area being evaluated.

Compliance scores are calculated by dividing the sum of all yes responses by the sum of all yes and no responses (**rating achieved/possible rating**) and are expressed as a percentage. Institutional tours and systems evaluations are scored as compliant or non-compliant. Individual screens with a compliance percentage below 80%, as well as tour and systems requirements deemed non-compliant will require completion of the CMA's corrective action process (CAP) and are highlighted in red.

INSTITUTIONAL DEMOGRAPHICS AND STAFFING

South Florida Reception Center – South Unit (SFRC-South) houses male inmates of minimum, medium, and close custody levels. The facility grades are medical (M) grades 1, 2, and 3, and psychology (S) grades 1, 2, and 3. SFRC consists of a Main Unit and South Unit.¹

SOUTH FLORIDA RECEPTION CENTER - SOUTH

The CMA conducted a thorough review of the medical, mental health, and dental systems at SFRC-South on October 21-23, 2025. Record reviews evaluating the provision and documentation of care were also conducted. Additionally, a review of administrative processes and a tour of the physical plant were conducted.

Detailed below are results from the institutional survey of SFRC-South. The results are presented by assessment area and for each screen of the monitoring tool. Compliance percentages are provided for each screen.

Consultation Services Discussion:

Screen 3: The following routine requests for services were not completed within 45 days as required:

- In the first record, a request was submitted 5/29/25 to the gastroenterologist for GERD possibly related to a prior H. Pylori infection. The patient was not seen until 9/29/25.
- In the second record, a request was submitted 4/17/25 to nephrology for a patient with chronic kidney disease and edema. The patient was not seen until 9/15/25.
- In the third record, a request was submitted 6/10/25 for a chest CT and pulmonology follow up. The CT was completed 8/29/25 but the pulmonary appointment did not occur until 9/10/25.
- In the fourth record, a request was submitted 5/15/25 for a loop recorder check at the pacemaker clinic. The appointment was scheduled for 11/18/25.
- In the fifth record, a request was submitted 4/3/25 for a prostate MRI due to urinary retention and back pain. It was not completed until 7/31/25.

- In the sixth record, a request was submitted 5/9/25 to urology for elevated prostate specific antigen levels. The appointment was completed 9/19/25 and a biopsy recommended.
- In the seventh record, a request was submitted 5/20/25 to ophthalmology due to glaucoma, eye pain, and decreased vision. The appointment was completed 9/24/25.
- In the eighth record, a request was submitted 4/17/25 to neurology due to a meningioma. It was completed 9/16/25 via telehealth.
- In the ninth record, a request was submitted 5/2/25 to urology due to urinary retention. The patient was not seen until 9/19/25.
- In the tenth record, a request was submitted 4/1/25 to urology for a follow up after cystoscopy and urethral dilation. It was not done until 6/19/25.
- In the eleventh record, a request was submitted 7/2/25 for hernia surgery. The patient was not scheduled until 12/16/25.

Screen 4: Per Health Services Bulletin 15.09.04, if the consultation is not completed within established time frames, the provider will monitor the patient's condition at least weekly until the patient is seen, to assess whether the acuity status of the consultation should be upgraded. In all of the deficient records, there was no documentation that confirmed the medical provider was monitoring the patient's condition and that there were no substantial changes that would warrant more immediate action.

Interview Summaries

INMATE INTERVIEWS

Twelve inmates agreed to participate in interviews with CMA staff. Overall, inmates were familiar with how to access medical, dental, and mental health services. Inmates were complementary of medical services and indicated sick call and emergency services were administered timely. Inmates denied difficulty obtaining prescribed medications. Additionally, inmates who had received dental services reported satisfaction. Inmates that received mental health services indicated that counseling, case management and psychiatric medication services were helpful in dealing with psychological symptoms and prison adjustment.

MEDICAL STAFF INTERVIEWS

Five members of the medical team including nurses, clinical, administrative, and clerical staff, participated in interviews. All interviewees appeared knowledgeable about procedures for accessing health services. All were knowledgeable about policies and procedures related to sick calls, emergencies, and medication administration. They indicated that they work well as a team. Staff indicated that additional space to perform exams is needed.

MENTAL HEALTH STAFF INTERVIEWS

One mental health staff member participated in an interview and appeared knowledgeable about the inmates on the caseload. Staff demonstrated good clinical knowledge and was familiar with policies and procedures related to the accessing of mental health care. They explained that mental health staff from SFRC Main rotate coverage for the South Unit due to staffing shortages.

SECURITY STAFF INTERVIEWS

Three correctional officers were interviewed. Security staff appeared knowledgeable about policies pertaining to the sick call process and the accessing of emergency and routine medical care. They described a good working relationship with medical and mental health staff.

All items that scored below 80% or were identified as non-compliant should be addressed through the corrective action process. Within 30 days of receiving the final copy of the CMA's survey report, institutional staff must develop a corrective action plan (CAP) that addresses the deficiencies outlined in the report and in-service training should be conducted for all applicable findings. The CAP is then submitted to the Office of Health Services (OHS) for approval before it is reviewed and approved by CMA staff. Once approved, institutional staff implement the CAP and work towards correcting the findings.

Usually, four to five months after a CAP is implemented (but no less than three months) the CMA will evaluate the effectiveness of the corrective actions taken. Findings deemed corrected are closed and monitoring is no longer required. Conversely, findings not corrected remain open. Institutional staff will continue to monitor open findings until the next assessment is conducted, typically within three to four months. This process continues until all findings are closed.

Recommendations

In addition to the needed corrective actions described above and based upon the comprehensive review of the physical, mental health, and administrative services at SFRC-South the CMA makes the following recommendations:

- Ensure consultation appointments are completed within the required timeframes.
- Ensure yearly immunity clinic appointments are completed in their entirety.
- Ensure that group therapy is offered.
- Ensure that inmates receive mental health discharge planning services as applicable.
